

WESTWOOD HIGH SCHOOL MATRIX PROGRAM

What is Matrix?

The Matrix Program is an academically challenging, fun and technology enhanced way of learning in the classroom. The program places an emphasis on students receiving the highest level of academics possible. The program is enriched through projects, assignments and technology in the student's learning.

We believe the learning should go on both inside and outside the classroom as well. Field trips and out of school activities play a big role. Past trips include Quebec City, Boston, New York, Washington, camp in the Laurentians, theaters and geocaching among others.

Students must perform community service along with being active in school life. They are expected to be leaders and role models in the school.

Students use personal laptops in and outside the classroom to enhance their learning. Teachers are trained in using technology in the classroom in order to let our students learn and create using 21st Century tools.

Which Classes Are Enriched

GROUP 1

Math

Science

Why Matrix?

Challenging curriculum!

Experienced Subject Teachers in curriculum and in using technology for learning.

Classroom Environment: Class of strong students who are able to work together and challenge each other.

Technology. Ability to have students create and play a strong role in their own personal learning.

Learning outside the classroom: Field trips, school life and community service.

FUN & CHALLENGING!

How Do I Apply?

Application forms will be given to our LBPSB grade 6 students sometime in September.

Forms are also available on Westwood H.S. Junior's website westwood.lbpsb.qc.ca and on the Lester B. Pearson School Board's website lbpsb.qc.ca both under "Open House".
